Professional Summary

Cybersecurity-focused IT professional with experience in threat detection, cloud security, endpoint protection, and infrastructure hardening. Skilled in tools such as AWS, Azure, Splunk, and Security Onion. Known for building secure, testable environments and solving real-world problems in complex, multi-platform ecosystems.

Skills

Security+, Azure, IAM, EDR, Splunk, SIEM, Nessus, pfSense

Projects

Cybersecurity Lab (VMWare): Built a segmented lab with Splunk, Security Onion, Suricata, Nessus, and pfSense. Simulated threat environments for incident response.

AWS Cloud Security Lab: Configured T-Pot honeypot on EC2 with GuardDuty, VPC Flow Logs, and AWS Detective to monitor and analyze threat data.
